

DIVYA N

OBJECTIVE

To leverage my skills as a Computer Science Engineering student specializing in full stack development to create efficient, user-friendly applications while embracing emerging technologies. I aim to contribute to innovative projects that solve real-world problems, enhance my technical expertise, and grow as a versatile software professional.

PROJECTS

Online Internship Application Verification Management System Ongoing

Developing a MERN-based web application that enables secure internship applications with company verification, role-based access control, JWT authentication, and centralized tracking for students, companies, and administrators.

worker management System May 2025

- Built a Worker Management System with Spring Boot, Maven, and MySQL, featuring CRUD operations for workers and users.
- Created role-based authentication with separate admin and user logins.
- Designed a scalable backend architecture for efficient data processing and communication.

Meesho Replication (Figma) Feb 2025

- Recreated Meesho website design in Figma with clean, responsive layouts.
- Designed home page, product listings, filters, and navigation flow matching Meesho's UI.
- Built interactive prototypes to demonstrate user interactions and smooth page transitions.

ACHIEVEMENTS

- NPTEL Discipline Star – National-level recognition awarded by NPTEL
- Secured Runner on paper presentation at Bannari Amman Institute of Technology
- Awarded special mention at Smarthathon 2.0(24-hour national hackathon) in the Intelligent Data Center Optimization domain after clearing two rounds and reaching the finale at st.joseph's college of Engineering

ONLINE COURSES

- Database Management System – Infosys SpringBoard
- DBMS course (Master the Fundamentals and Advanced Concepts) – Scaler
- Network Addressing and Basic Troubleshooting – Cisco Networking Academy
- Snowpro Associate:platform – snowflake

EDUCATION

2023 – 2027 BE CSE

National Engineering College
CGPA – 7.57

2022 – 2023 HSC

CKT Matriculation Higher Secondary School
Percentage – 80.6%

SKILLSET

Front End : HTML , CSS , JavaScript , React

Languages : C++ , Java , Python, html

Data Bases & Backend : MySQL , MongoDB , Node.js, Nosql

Technical Skills :

Linux , Django , Web Development , Operating System , Networks , Problem Solving, Flask, Flutter, React,Data Science

Tools : Git and GitHub , Figma , Canva, Docker, Jenkins
